

ICE Pro Fumigator

Water based smoke generator

HOW TO USE:

Tear off the poly packing covering the fumigator. Take out the aluminum packing from the plastic container and tear off the aluminum packing.

Pour water up to the line indicated on the lower portion of the container (around 1cm).

Place the tin can inside the plastic container with water. Be sure the red seal of the tin can is in the upper position.

Place the fumigator in the center of the room. Fumigation will start within 1-2 minutes after placing the tin can inside the container with water. Keep the door and windows closed for 2-3 hours. For best results, keep the door and windows closed for longer period

Instructions leaflet

Individually packed

FEATURES:

- FLUSH-OUT EFFECT

ICE Pro Fumigator

New insecticidal fumigator. It comprises of active ingredient of **d-T80-cyphenothrin** and an exothermic substance capable of evolving heat on contact with water.

It Kills all species of roaches, bedbugs, fleas, flies, mosquitoes and small flying and crawling insects.

ADVANTAGES:

It emits vapor of active ingredient uniformly throughout a wide space to crack and crevices, and kills and controls insects that are hidden.

A new technology that does not require fire ignition.

It does not emit toxic / irritative gas but emits a pleasant vapor of fragrance as it effectively kills insects.

It does not stain walls, carpets, furniture, etc.
