

# TEMPRID

A new dimension where pests cease to exist

## TEMPRID™

Temprid is the only product you'll ever need for:

- General insect management
- Perimeter pest management
- Bed bug management - Kills bed bug eggs too!

Temprid's unique Homogenised Active Solution (HAS) technology maximises:

- The performance of both active ingredients

Bayer's "HAS" technology combines both actives via a unique milling process which defines precise tolerances to ensure optimum particle size. This ensures the two actives work together to maximum effect. Therefore Temprid "does it better" by delivering:

- Enhanced effectiveness the two active ingredients
- Unsurpassed results (knockdown and residual)
- Greater coverage of treated areas
- Better insect exposure to both actives
- Better suspension in the tank

Micro-crystals on a German cockroach's leg.
